Subject: CODED PAY ITEMS

Date: November 5, 1998

ILLINOIS DOCUMENTS
DEC 0 9 1998
ILLINOIS STATE LIBRARY

Attached for your use is a copy of our Coded Pay Items Book adopted January 1, 1999, which conforms to our Standard Specifications for Road and Bridge Construction, adopted January 1, 1997, the Supplemental Specifications and Recurring Special Provisions, adopted January 1, 1999.

This revised edition (with pages dated November 4, 1998) supersedes and replace all Code Books published prior to this date and will become effective January 1, 1999.

This revised edition contains approximately 18,769 pay items, including the "Metric" pay items. We realize this Coded Pay Items Book is not an all-inclusive list of possible pay items which could be involved in road and bridge construction, and that it may be necessary for the designer to utilize pay items which are not included in this book. However, we trust that the pay items which are included in this book will be used whenever possible and that the practice of generating new pay items will be held to a minimum.

As in previous code books, an asterisk (*) after the code number indicates a non-standard pay item. Non-standard pay items are not covered by the Standard Specifications. Special Provisions will be required for clarification of these items unless they are covered by some other method.

YOUR COOPERATION IN MAKING THE MAXIMUM USE OF THE PAY ITEMS PUBLISHED IN THIS REVISED EDITION RATHER THAN CREATING NEW PAY ITEMS WILL BE GREATLY APPRECIATED.
